This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

Foreword

PERHAPS never since the *really old days*, has story-telling had such a large place in the life of the child as at the present time. The demand for the story is felt by the teachers in all the grades, by the director on the playground, by the librarian, and by the Sunday School instructor. As for the mother, she has always recognized the value of the story, but even her recognition, and her need, at the present time seems a more definite and specific one.

With the demand for the story comes the need for the right material. The average teacher, student and parent have all too little time at their disposal to search for good material,—material which will require the least possible preparation in the matter of adaptation.

The following stories have been tested in many schools and grades, and the present classification is the result, the story being finally placed in the grade where the appreciation and understanding seemed to demand it.

That there are sometimes but three or four stories taken from a book does not mean that the remaining stories may not be excellent, but rather that those mentioned have been found especially suited for the place given them in this outline.—*I. O. MacKenzie.*

A list of Nursery Rhymes and Stories is in preparation for the Home and Kindergarten.

Second Grade

"The mere fact that a thing has existed for a thousand or two thousand years is not always proof that it is worth preserving. But the fact that after having been repeated for two thousand years, a story still possesses a perfectly fresh attraction for a child of to-day, does indeed prove that there is in it something of imperishable worth."—*Felix Adler.*

Ethical aud Bible Stories	The Sailor Man The Apron-string The Day The Golden Windows	The Golden Windows—*Richards.* * **Little, Brown & Co.**
